Achievements

2025

Deployed My Own Photos server / https://photo.tyfsadik.org/

II just set up my own private photo and video gallery using Immich, Docker, and Cloudflare Tunnel on an old laptop with 1TB storage. No more relying on paid services like Google Photos or iCloud—my memories are now secure, free, supported on android or iphone or mac and under my control!
Features:
1. No port forwarding (thanks to Cloudflare Tunnel)
2. Full data control & backups
3. Fully Secure & Prioritize data privacy
GitHub repo with full setup + guide – https://github.com/TYFSADIK/personal_media_server

2025

Self-Hosted My Own Cloud Storage / https://cloud.tyfsadik.org/

I deployed a secure, production-ready Nextcloud instance using Docker, MariaDB, and Cloudflare Tunnel — fully accessible via my custom
Features:
1. No port forwarding (thanks to Cloudflare Tunnel)
2. Full data control & backups
3. Fully Secure
GitHub repo with full setup + guide – https://github.com/TYFSADIK/Personal_Cloud

2024

Deployed My Own Private(Public)Search Engine / https://search.tyfsadik.org/

Why This Matters:
- Search in total privacy — no logs, no tracking, no ads
- Your queries stay yours — even ISPs & Google can't see them
- End-to-end encrypted via HTTPS (Caddy + Cloudflare Tunnel)
- Open-source & self-hosted — full control, no big tech spying
- Powered by: Docker, SearXNG, Caddy, Cloudflare Tunnel
- Source Code: https://github.com/TYFSADIK/search_engine

2023

Developed My Own private AI model / Not enough resouses to host it

Why This Matters:
- You can ask whatever you want.
- No one will trace or monitor your questions.
- Legal or illegal — it doesn't matter.
- I've optimized it so no GPU is needed, but if you have one, it will enhance the experience.
- Recently, I added a web search option to provide up-to-date answers based on your questions.
- This is your personal buddy — it knows everything.
- I will host it very soon
